Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 9th, 2003 has been entered.

Response to Arguments

1. Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Danielle (U.S. Patent No. 5,444,779) in view of Fox et al (U.S. PG Pub 2003/0069873).

4. As per claims 1 and 6, Danielle teaches a method and system of collecting a copyright fee (*electronic copyright royalty accounting system*) relating to a document when a user (*user*) obtains via coded data disposed on a surface (*printed copyright document*) (*see abstract, fig 2*), the document, the method including in a computer system (*database type system, 54*) recording a copyright owner relating to a portion of the document (*see column 8 lines 22-39*), receiving (*sense*) from a sensing device (*glyphs detector, 30*), indicating data indicative of a request for the document (*document to be printed*), the sensing device, when placed in an operative position relative to the surface, generating the indicating data using one of the coded data (*see fig 3, 4, column 8 line 40-9 line 26*), determining the fee from the ownership and debiting a user account associated with the user in the amount of the fee (*see column 9 line 39-10 line 35 11 line 45-12 line 39*). Danielle fails to teach an inventive concept of identifying in the database identifying the request document, retrieving the document from the document database and providing the document to the user. However, Fox et al teach an inventive concept of identifying in the database identifying the request document, retrieving the document from the document database and providing the document to the user (*see paragraph 0014, 0017, 0039-0041*). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Danielle's inventive concept to include Fox et al's inventive concept of identifying in the copyright database and from the indicating data, the copyright owner relating to the document because this would have provided a method for quickly and efficiently search the document data base and present the result in a meaningful manner.

Art Unit: 3621

5. As per claims 2 and 7, Danielle teaches a method and system further comprising crediting the owner account of the fee (*see fig 3, 4, column 8 line 40-9 line 26*).

6. As per claims 3 and 8, Danielle teaches a method and system further printing the document (*see fig 3, 4, column 8 line 40-9 line 26*).

7. As per claims 4 and 9, Danielle teaches a method and system further receiving device identity of the user and identifying the user account (*see column 8 lines 22-39*).

8. As per claims 5 and 10, Danielle teaches a method and system wherein the coded data is indicative of a region of the surface of the reference point of the region and a position of the sensing device (*see column 9 line 39-10 line 35 11 line 45-12 line 39*).
